                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             PERTURE:
NAME/KEY: PEPTIDE
LOCATION: (1)..(27).
COTHER INFORMATION: Xaa at residue 2, 7, 18, 19, 22 and 25 may be Arg,
OTHER INFORMATION: homoarginine, ornithine, Lys, N-methyl-Lys,
OTHER INFORMATION: N.N-dimethyl-Lys, N.N.N-trimethyl-Lys, any
OTHER INFORMATION: synthetic basic amino acid, His or halo-His; Xaa
